

LearningPlanet

Affordable learning to the world

www.learningplanetonline.com

Nine Reasons to Start Using LearningPlanet Today!

1. LearningPlanet is suitable for all front line staff and managers, whether phone based or in face to face roles
2. For one person, LearningPlanet is just US\$9.95 per month which provides unlimited access to libraries of 1 minute and 10 minute videos with workbooks. That's over 180 learning resources
3. Over 12 months, that's still under \$120 per person which is less than you would expect to pay for a one – day training programme on one topic
4. For teams, LearningPlanet is available at \$69.95 per month for up to 10 people to have unlimited access to the same libraries as an individual person
5. You can learn a technique to apply easily in just one minute or spend 10 minutes and complete an entire video module with a workbook.
6. Topics are all centered around customer service, sales and leadership as well as personal growth areas like time management and resilience skills
7. New content is added every month
8. There are no contracts, so there is no risk and you can cancel anytime. To cancel, just email us with that request at sales@learningplanetonline.com with your name and email address and that's it!

If that's not enough information – here are some FAQs that may help some more!

We don't have any budget	LearningPlanet is inexpensive. From just US\$10 per person per month the cost is very low. Lower than a one-day training course for individuals or groups and you have 12 months unlimited access. You can train 10 people for 12 months for US\$120 unlimited use on LearningPlanet. If you have a small team or just one person needing training, Individual licenses are just US\$9.95 per month.
We do our own training	That's great. LearningPlanet is not a replacement for your training. It's designed to be a refresher tool on a wide range of soft skills topics. It's generic enough to help people apply it to most roles and assist with an ROI on in house training.
It's too generic	LearningPlanet is designed to be for many organisations. We have introduced workbooks and interactive exercise for users to reflect on how to apply the principles in their own role. This helps to make it relevant to their role. The skills are relevant for all organisations and roles as we are training on

	transferrable soft skills.
We already have an e-learning system	<p>Most businesses we speak to have one these days. We also notice that these systems focus on systems and the organisational practices. Very few include the soft skills we are providing.</p> <p>We have discovered through research it can take up to TWO years for an organization to build their own soft skills training content.</p> <p>LearningPlanet videos are available for sale and can be used on your own LMS.</p>
We can't access videos	<p>A lot of businesses put restrictions in place for access to sites like YouTube. We understand that. Our site uses Vimeo and when the videos are played, they do not offer access to the Vimeo site as they are embedded into the system. Your IT people can have a look at the site so they can see how to allow access for your people to watch the videos. In addition, as its web based, people can access it from any internet connected pc / smart phone – even at home. You may like to consider having some dedicated PCs available and roster people on for training.</p>
Are we tied into an annual contract?	<p>No, LearningPlanet licenses are rolled over month to month until you ask us to stop. There is no contract. You can cancel anytime.</p>
How can I pay?	<p>Our payment terms are payment on the first day of use by credit card.</p> <p>You can pay monthly, quarterly, 6 monthly or annually whichever way is easier for you!</p>
What if one of my people leaves do I have to pay for a replacement?	<p>That's okay. If they are on an individual license, you can stop their license anytime. You can replace them with a new person for free with a new user name and password. If you are on a site license then nothing changes and you give your new person the access details.</p>
How stable is your system?	<p>We are currently hosted in The Cloud with a range of back up redundancy servers in both Asia Pacific and Americas. Our present track record is the system has been down less than 2 hours in total over a period of 5</p>
